4. Indications that the Iranian state was the originator

In view of the objective and the ascertained similarity of the weapons used in the [criminal] offense and of the silencers, the assassination plot fits into a series of 22 assassination attempts carried out since 1980 against Iranian oppositionists outside of Iran.

The pistol LLAMA, identified as the weapon used in the crime, was delivered by the Spanish manufacturer to the Iranian army. Subject to the still pending [expert] report, the silencer used in the present case was manufactured from the same raw material (aluminum pipe) as the silencers seized in the cases of the assassination attempts on NOHAMMADI and JAVADI.

The training in Iran of the accused AMIN and RHAYEL as frogmen must be deemed another indication of Iran as the originator.

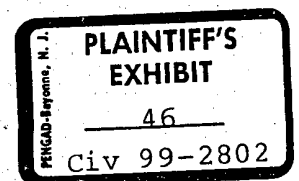

In particular, the interview of FALLAHIAN, the Minister of the Iranian Intelligence Service, broadcast on August 30, 1992 in the first Iranian television program, is an indication of an assassination attempt on the directive of Iran.

He [Fallahian] stated that, among other things, decisive blows against DPKI outside of Iran had been successful. He further talked about an infiltration by the Iranian intelligence service of the central organizations of such small groups, and he depicted the DPKI as such.
